CHICAGO 45, ILLINOIS

NEW AND OUTSTANDING

PETUNIA HYBRIDA NANA COMPACTA—FIRE CHIEF

First Gold Medal winner in 11 years and the only **A.A.S.** flower winner for 1950. Brilliant scarlet red flowers, an entirely new color in this class. Plants, dwarf and compact with long blooming season.

PETUNIA HYBRIDA NANA COMPACTA—BLUE BEDDER IMPROVED

A new mid-blue Petunia of more compact habit than any other variety of similar color. Not only is it more compact growing but very free-flowering and a more pleasing color. An additional feature is its early blooming habit in flats or pots, making it especially desirable for bedding-plant trade.

FOUR NEW HYBRID PETUNIAS

Grown by Pan-American Seeds, Inc., originators of the Pan-American All-Double Glorious Strain Petunias. Mr. Chas. Weddle of Pan-American Seeds states as follows:

"Here is something new and outstanding. Last year, we offered as a sort of feeler SNOWHITE, our first Hybrid Grandiflora Dwarf Fringed Petunia. The response was good so this year we are offering 3 additional hybrids. No. 1, a Deep Salmon on the order of Carmencita; No. 2, a Carmine Rose; No. 3, CHARM, a dwarf bedding hybrid of the Celestial Rose type. Although the cost of production of hand pollinated seed of single Petunias is almost as high as it is for the doubles, we are certain that they are worth the difference. We hesitate to describe them for fear we will sound too enthusiastic."

DWARF FRINGED HYBRID SNOWHITE. Single, pure, white with yellow throat. Usually 100% true to type and habit. Dwarf, fringed, vigorous and free blooming. Sown in December, it makes a gorgeous Easter pot plant. Flowers 3-3½ inches across.

DWARF FRINGED SINGLE HYBRID No. 1. Deep scarlet salmon, fringed dwarf, colors almost as bright as Carmencita. Flowers larger, more abundant and plants more vigorous than the Dwarf Erfurts, either in pots for Mother's Day or as a bedding Petunia.

DWARF FRINGED SINGLE HYBRID No. 2. Gorgeous carmine rose, uniform, extra dwarf, well fringed. Outstanding either as a pot plant or in the garden. Blooms profusely all summer long and retains its dwarf compact habit. Makes ordinary Petunias uninteresting.

Prices, above 3; Each: 1/2 Tr. Pkt.....\$1.40 1 Tr. Pkt.....\$2.50

DWARF HYBRID MULTIFLORA "CHARM." Clear luminous rose pink of the Celestial Rose type, which will out-perform anything in its class. Four things of these Hybrid Bedding Petunias are outstanding. **They are uniform. They are more vigorous. They are freer of bloom. They show color early and uniformly.**

ASTER—LITTLE GIANTS "Wilt Resistant"

Here is a distinctive new type of early Aster. Plants grow 12 inches tall and form a perfect mound of flowers. Its blooms are of the feathery Crego type, 4-5 inches in size, and a plant will have 40-50 flowers showing at the same time. Habit of growth is somewhat similar to a miniature Christmas tree, as the branches spread laterally out from a strong center trunk. Each branch carries from 3-5 flowers. Well suited for bedding purposes, or for borders in front of the taller and later flowering sorts. Extremely floriferous and with little care can be kept in bloom until frost. **Azure Fairy**, lavender; **Rosamond**, soft rose pink; **White Mound**, pure white; **Formula Mixture**, above 3 colors.

VARIETIES FOR 1950

ASTER SUPER GIANT—SANTA MARIA

The largest pure white Aster on the market today. Flowers average over 6 inches in diameter and have long lacy white petals. These mammoth blooms are carried on strong 2½ foot stems. Habit is base-branching. Medium early flowering. Picked as the buds are opening, "Santa Maria" makes an excellent shipper for Florists.

Tr. Pkt.....35c ¼ oz.....85c 1 oz.....\$3.00

DWARF ANNUAL LUPIN 8"—PIXIE DELIGHT

A gay little mixture of pleasing shades of pink, rose, blue, lavender and white, as well as bicolor combinations. Very early and free blooming, a fine novelty item, useful in borders, bedding, and as a pot plant.

Tr. Pkt.....35c ¼ oz.....75c 1 oz.....\$2.50

MARIGOLD (Dwarf French Double)—ELDORADO

A live, pleasing canary yellow, tinted slightly deeper toward the center of the flower. Grand for borders and edging, the early profusion of clear, full double blooms on uniform plants maintain their form throughout a long blooming season. Plants grow about 10 inches in height. Prior to the introduction of Eldorado, the dwarf class of Marigold was without the canary yellow color.

Tr. Pkt.....25c ¼ oz.....50c 1 oz.....\$1.75

MARIGOLD—COLORADO SUNSHINE (For Forcing and Outdoors)

The luminous golden yellow flowers with ruffled and wavy petals are 3 inches or more across and the stems are long and strong. At 60° night temperature, it will bloom in midwinter. An August/September sowing, plants grown cool, will make for December bloom and another in January for Memorial Day. For the December cut space 4"x6", disbud to single stems and for the spring crop 12"x12" and allow it to come naturally. As summer cut flowers outside, it is unexcelled.

Tr. Pkt.....35c ¼ oz.....85c 1 oz.....\$3.00

A NEW MISSION GIANT MARIGOLD—LIMESTONE

Beautiful chrysanthemum type incurved flowers of typical Mission Giant habit of growth, bloom size and season. A soft lemon yellow comparable in color to Lemon Queen, which completes the color range of this chrysanthemum flowered group so well begun with Goldsmith and Yellowstone.

Tr. Pkt.....35c ¼ oz.....\$1.00 1 oz.....\$3.25

VERBENA DWARF COMPACT—PIXIE

Makes a compact 6 inch plant that is entirely covered with flowers, which are a bright scarlet with a distinctive cream eye. Its habit is very uniform. Individual florets are large and form perfect flower heads. Well adapted for borders, as its scarlet color forms a brilliant outline.

Tr. Pkt.....50c ⅛ oz.....\$1.75 ¼ oz.....\$3.00

A NEW GERBERA (Transvaal Daisy) "Waller-Franklin Hybrids"

A brand new exclusive strain, what we believe to be the finest color range obtainable from seed. Long solid stems topped by large yet graceful blooms in varied brilliant and unusual colors heretofore rarely obtainable even from plant stock. Five inch blooms, many are duplexed.

100 seeds.....60c 1000 seeds.....\$5.00 5000 seeds.....\$22.50

HOLLYHOCK—DOUBLE TRIUMPH SUPREME

Color range of unsurpassed variety. All the favorite colors plus vivid scarlets, orange, and buff combinations not to be found in existing strains. Full double blossoms gracefully waved and fringed show well above the foliage. Rust resistance is present to a high degree, greatly overcoming this major handicap to the growing of Hollyhocks in many areas. An additional feature is its early blooming habit.

ANTIRRHINUM (Snapdragons)—Continued

TETRAPLOID OR SPRING FLOWERING SNAPDRAGONS. This new class of Snapdragons is proving to be of value to florists for spring and summer cutting, both indoors and out. They extend the Snapdragon season as the Cuthbertson's Spring Flowering Sweet Pea does for that crop. The Tetras produce heavy stems with long spikes and huge florets.

Pan-American Pink. A tetraploid hybrid. Deep rose pink. Good indoors for a spring crop or for summer bloom outside. Definitely the outstanding Tetra Snap to date.

½ Tr. Pkt.....\$1.75 1 Tr. Pkt.....\$3.00

Tetra Yellow. Huge spikes and large fringed florets, bright yellow. Comes into bloom in May from November sowing. Makes diploids look tiny. Good cut flowers whenever grown, both indoors for spring or for summer cut outdoors.

½ Tr. Pkt.....80c 1 Tr. Pkt.....\$1.50

STANDARD OUTDOOR OR SUMMER SNAPS

TETRAPLOID MIXED. The most satisfactory outdoor Snapdragon offered today, a vigorous grower, almost never "crippled" with rust. Florets are huge, mostly ruffled, and stay on the stem so that 12" flower spikes are usual. Many beautiful colors and combinations, some never before seen in Snaps.

Tr. Pkt.....50c ⅛ oz.....\$1.00 ¼ oz.....\$1.75 1 oz.....\$6.00

MAXIMUM. Rust Resistant Garden Snaps. Giant flowering, long stemmed.

Alaska. (Snowflake) Pure White.

HOLLYHOCK-DOUBLE TRIUMPH SUPREME

Color range of unsurpassed variety. All the favorite colors plus vivid scarlets, orange, and buff combinations not to be found in existing strains. Full double blooms gracefully waved and fringed show well above the foliage. Rust resistance is present to a high degree, greatly overcoming this major handicap to the growing of Hollyhocks in many areas. Early blooming.
